

SIKA AT WORK

HALL & WOODHOUSE BREWERY, DORSET, UK

FLOORING: Sika® Ucrete® UD 200, Sika® Ucrete® HPQ

BUILDING TRUST

FLOORING SOLUTION FOR UPGRADE OF EXISTING BREWERY

PROJECT DESCRIPTION

Project name: Wall and Woodhouse Brewery
Location: Blandford, Dorset

The Hall & Woodhouse Brewery was founded in 1777 by Charles Hall in Blandford Forum, Dorset. It is a family-owned brewery and operates over 230 public houses stretching from Bristol to Exeter and London to Brighton in the South of England under the trading name of Badger Brewery.

PROJECT REQUIREMENTS

The upgrading of the Hall & Woodhouse brewery was an exciting project and the first new brewery the company has built since 1899.

The new £5million brewhouse was designed to produce 12 beers with room for future growth. As such, it required a safe, non-tainting, heavy duty flooring system with excellent heat, chemical and impact resistance.

Any product name or reference reflects the Sika product name at the time of creation of this document and may differ from the product name or reference during past events.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.

SIKA SOLUTIONS

The floor surfaces chosen for the project were Sika® Ucrete® HPQ heavy duty polyurethane colored quartz screed and Sika® Ucrete® UD 200 heavy duty polyurethane screed.

The Sika® Ucrete® materials were chosen due to their high chemical, abrasion and slip resistance properties, whilst the thermal resistance (80°C at 6mm and 120°C at 9mm) made them an ideal solution for the harsh environment of a brewery.

The first phase completed by Licensed Sika® Ucrete® Applicator, Ancorite, which applied in excess of 1,500m² of Sika® Ucrete® HPQ and Sika® Ucrete® UD 200, whilst in the second phase a further 1800m² of Sika® Ucrete® UD 200 was laid by Polydeck Resins, another Licensed Sika® Ucrete® Applicator.

Sika® Ucrete® hygienic floors provide ideal floor finishes for many industries, particularly in the food, beverage, chemical and pharmaceutical sectors. They offer a uniform and seamless flooring system that creates a safe and attractive working environment. Dense and impervious, Sika® Ucrete® surfaces retain their integrity at temperatures of up to 130°C and have been proven to meet the most stringent hygiene and cleanliness requirements where a long-lasting robust floor is crucial. For employee safety, a wide range of slip resistant profiles are available.

PROJECT PARTICIPANTS

Project Owner: Hall & Woodhouse Brewery
Applicators/Contractors: Ancorite, Polydeck Resins
