

# SIKA AT WORK

## VLEVY NV, HULSDONK, BELGIUM

FLOORING: Sika® Ucrete® DP

# Ucrete® HYGIENIC FLOORING

## PROJECT DESCRIPTION

Project name: New Production Halls  
Location: Hulsdonk, Belgium  
Size: 2000m<sup>2</sup>

Vlevy NV, was founded in 1891 in Ghent specializing in meat products including ham, turkey, chicken, beef, pepperoni, salami, chorizo and more – for wholesalers, foodservice and ready-to-serve meal producers.

To meet the emerging and growing demand for their produce and the highest quality standards Vlevy NV founded a new factory in Hulsdonk

## PROJECT REQUIREMENTS

When working with cooked meats that are ready to eat, strict hygiene controls are required. So, the new production had to work to the highest hygiene standards.

The floor also needed to provide a safe working environment so a slip resistant floor with a surface structure that could be easily and hygienically clean was required.

The floor also had to resist to heavy mechanical loads and the high temperatures encountered during cleaning.

Any product name or reference reflects the Sika product name at the time of creation of this document and may differ from the product name or reference during past events.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.

## SIKA SOLUTIONS

A Sika® Ucrete® solution giving a slip resistant floor that could be cleaned to the same standard as stainless steel was the obvious choice, given the demands of the client.

Following consultation with the client Sika® Ucrete® DP was chosen to give the right degree of slip resistance combined with the required temperature and mechanical resistance in the various production zones within the facility.

Sika® Ucrete® flooring is non-solvented and is non-tainting so does not affect the taste of food stuffs even during application. It has a Gold Indoor Air Comfort certifications from Eurofins demonstrating that it meets all European emission standards.
