

SIKA AT WORK

MARINE HARVEST PIETERS, BRUGES, BELGIUM

FLOORING: Sika® Ucrete® DP 10

BUILDING TRUST

NEW CONSTRUCTION / PRODUCTION AREA

PROJECT DESCRIPTION

Project name: Marine Harvest Pieters
Location: Bruges, Belgium
Year: 2012
Size: 4,000 m²

Marine Harvest Pieters is a dynamic company in the seafood sector, specializing in the production and marketing of a wide range of fresh and frozen fish products. Due to the renovations of existing floors and the construction of a new production area, Marine Harvest went in search of a flooring solution that best met their needs.

PROJECT REQUIREMENTS

Due to continuous floor cleaning and ice delivery, a non-slip profile was desired. For hygienic reasons, the floor must be easy to clean and resistant to mechanical shocks.

SIKA SOLUTIONS

Sika® Ucrete® DP 10 (yellow) was chosen to meet the client's wishes. It is a floor finish qualified for wet environments, with exceptionally high resistance to mechanical shocks. The system, with a uniform DP10 surface texture, provides the necessary slip resistance for a safe working environment. Sika® Ucrete® DP 10 is ideal for simple and hygienic cleaning.

Sika® Ucrete® DP 10 provides a safe floor for users thanks to its slip resistance. The system is hygienic and impermeable, preventing the growth of bacteria. Sika® Ucrete® meets the HACCP standard, which is important for food hygiene, and all emission requirements for indoor flooring systems in Europe. It is a product without volatile substances, making the floor safe for food, personnel, and the environment. Additionally, it is resistant to solvents, chemicals, thermal shocks, and mechanical shocks, while also being easy to maintain.

PROJECT PARTICIPANTS

Project Owner:	Marine Harvest Pieters
Designer/Architect:	Bureau d'Etudes 4Takt
Applicator/Contractor:	DIF
