

SIKA AT WORK

DEL MONTE FOODS, DUBAI, UNITED ARAB EMIRATES

FLOORING: Sika® Ucrete® DP 10, Sikafloor®-1710

BUILDING TRUST

NEW PRODUCTION AND PROCESSING FACTORY

PROJECT DESCRIPTION

Project name: Del Monte Foods (U.A.E.) Fze
Location: Dubai, U.A.E.
Year: 2006

Del Monte Foods (U.A.E.) Fze is a food processing and packaging plant for fresh fruits and foods under strict hygienic conditions to meet European and American hygienic standards for local market and international export market. They required a slip-resistant flooring system for wet production and processing areas and a smooth finish flooring system for packing areas with long-term durability and performance under stringent housekeeping in their factory.

PROJECT REQUIREMENTS

All production areas where food products were handled required a flooring system that met hygienic standards, offered high temperature and chemical resistance, and was seamless, durable, and maintenance-free. Metal lath and stainless-steel bird beak needed to be fixed to insulate panels prior to installation to form the skirting.

SIKA SOLUTIONS

To meet the client's requirements, Sika® Ucrete® DP 10 for production and processing areas and Sikafloor®-1710 for chiller and packaging areas were proposed as the flooring systems.

Sika® Ucrete® DP 10 can withstand temperatures from -40°C to 120°C and will not delaminate due to stress caused by thermal shock. Sika® Ucrete® DP 10 was approved by Dubai Municipality and meets all European and American hygienic standards and regulatory agencies. Sika® Ucrete® DP 10 flooring is easy to maintain and can be cleaned with almost all industrial detergents. Wear-resistant to heavy traffic, including steel wheel trolleys, hand pallet trucks, and forklifts, Sika® Ucrete® DP 10 is non-tainting after application, seamless, and slip-resistant.

PROJECT PARTICIPANTS

Project Owner: Del Monte Foods (U.A.E.) Fze
Consultant: Orion Engineering Consultants
Applicator: Belhasa Projects LLC & Amana Steel Buildings Contracting Co. LLC
