

SIKA AT WORK

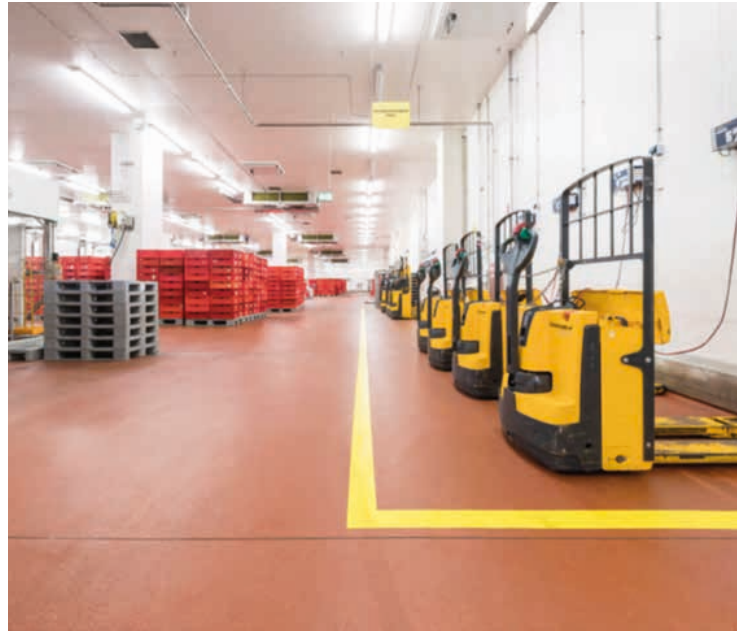

REWE, DORTMUND, GERMANY

FLOORING: Sika® Ucrete® DP 20, Sika® Ucrete® RG

BUILDING TRUST

HYGIENIC UCRETE FLOORING

PROJECT DESCRIPTION

Project name: REWE
Year: 2012
Location: Dortmund
Size: 8000m²

Founded over 100 years ago in the Ruhr region city of Dortmund, Rewe Dortmund is now a consortium of nearly 300 independent retailers in North Rhine-Westphalia. The central headquarters in Dortmund has a total storage area of over 100,000 square meters, supplying approximately 500 stores. After the old REWE butchery burned down in 2009, the decision was made to build a new central butchery.

PROJECT REQUIREMENTS

Despite the size of the operation, craftsmanship in butcher standards must be ensured because high-quality meat attracts customers to the quality supermarket. Particularly in the sensitive food processing area, strict guidelines have to be met, including requirements according to the International Food Standard (IFS). The floor required thorough cleaning and disinfection due to constant contact with fats, meat, and sausage residues. Therefore, a floor was needed that could withstand these stresses, dry quickly, and be slip-resistant.

SIKA SOLUTIONS

In the new central butchery, not only sausage and meat processing takes place, but also packaging, picking, and shipping. To meet the highest standards of cleanliness, hygiene, and occupational safety, Sika® Ucrete®, our polyurethane concrete floor solution, was used. Corresponding certificates and IFS test reports attest to the high quality of the product. Cleaning and disinfection demand a lot from the floor - here, the high chemical and thermal resistance of Ucrete proves its worth. The closed surface dries exceptionally quickly and provides no breeding ground for germs.

PROJECT PARTICIPANTS

Project Owner: Walravens NV
Applicator/Contractor: DIF
Designer/Architect/Specifier: Bureau d'Etude 4Takt
