TOMLINSON DAIRIES, WREXHAM, UK

FLOORING: Sika® Ucrete® UD 200

BUILDING TRUST

FLOORING SOLUTION FOR SHORT TIMESCALE IN DAIRY PRODUCTION AREA

PROJECT DESCRIPTION

Project name: Tomlinson Dairies
Location: Wrexham, North Wales

Founded in 1983, Tomlinson Dairies started out as a doorstep delivery milk service. Its reputation for quality and service led to an increase in demand and, as a result, it built a dedicated dairy next to its farm.

Now producing over 25 million liters of fresh milk a year and supplying over 300 outlets across Wales, the Midlands and the Northwest of England, the dairy needed an increase in its production capacity. This led to the company investing in a brand-new dairy with Sika being asked to provide suitable flooring solutions.

PROJECT REQUIREMENTS

During operation, dairies are usually wet and slippery, and products are very susceptible to tainting. As such, the new dairy required a safe, non-tainting, heavy duty flooring system with excellent heat, chemical and impact resistance.

The need to bring the new facility into production as soon as possible meant that the project had a very tight construction schedule.

Any product name or reference reflects the Sika product name at the time of creation of this document and may differ from the product name or reference during past events.

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.

SIKA SOLUTIONS

Over 5000m² of Sika® Ucrete® UD 200 was applied, with Sika® Ucrete® RG also applied to the skirting. Following the successful installation in the main production areas, we were asked to return to provide a similar flooring solution in the new yogurt production facility.
